

Dear EPA,

Further to our yesterday correspondence, kindly be advised that vessel Almi Galaxy has completed discharge operation at LOOP terminal and she is proceeding to rendezvous position for bunkering.

However due to unfavourable weather conditions in the area which is out of our control, bunkering operation will be postponed for tomorrow or the day after tomorrow, weather permit.

Therefore you are kindly requested to issue a waiver till Mar 2nd so the vessel to continue burning fuels with sulphur content more than 0.1%

Thank you.

Best Regards,
Dimos Karkantzios
